-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claim 1** is rejected under 35 U.S.C. 102(b) as being anticipated by **Worley et al (4,269,166)**. **Worley et al** discloses a vent damper assembly (10) and includes a base (26) with the damper extending from the base (SEE Figure 1) for limiting the flow from a flue (28) and includes a plurality of independently pivoted flat dampers (12, 14) and a frame (24) for supporting the dampers and enabling pivoting of the dampers from a closed position preventing ambient flow therepast to an open position allowing passages of exhaust gases; the dampers are generally parallel to exhaust gas flow in the open position.

**Claims 1, 5, and 6** are rejected under 35 U.S.C. 102(b) as being anticipated by **McCabe (4,372,485)**. **McCabe** discloses a vent damper apparatus (100) and includes a base (106), a damper assembly (100) extending from the base for limiting flow or air from flue, the damper includes a plurality of independently pivoted flat dampers (116, 118), a frame (102) for supporting the dampers and enabling pivoting of the dampers from a closed position preventing air flow to an open position allowing the passage of

gases, the dampers are generally parallel to exhaust gas flow in the open position (SEE figures 1-3), the damper includes tabs (228) for limiting movement of each damper past an open position with links (226) for controlling movement.

***Allowable Subject Matter***

**Claims 2-4, and 7-10** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
